

RIVER BLUFF PRESERVE

River Bluff Preserve spans 38 acres on the east bank of the Rum River and encompasses a variety of habitats including open prairie, woodlands, and wetlands. The natural-surface trails at River Bluff Preserve provide access to undeveloped nature close to home. Recreational opportunities within the park include hiking the trails, which connect to Martin's Landing to the north, fishing from a dock, and plenty of space to relax and enjoy the benefits of the outdoors. River Bluff Preserve is also home to the Isanti Community Garden where community members come together each growing season to grow a huge variety of flowers, herbs, vegetables, and more. This park provides educational opportunities through partnerships with local schools, giving students valuable hands-on experience. River Bluff Preserve will be an invaluable asset for the community for generations to come.

Please follow our rules:
